Choosing the right training experience is important.

At **Venture North Aviation** we work with you to complete your training in a timely and cost effective manner. We utilize real life challenges that are engaging and fun. Scenario based line oriented flight training (LOFT) has been a big part of the corporate and airline training world for many years. The concept of (LOFT) training is not new to aviation but is new to the General Aviation Community. Many flight schools and instructors miss the most important elements of the pilot learning experience.

- Scenario Based Training
- Risk Management
- Automation Management
- Task Management
- Aeronautical Decision Making
- Single Pilot Resource Management
- Train the way you Fly - Fly the way you train.*

These are just a few of the elements that each of our **Training Managers** (Flight Instructors) will focus on during your learning experience with Venture North Aviation Services LLC.
